## Proof of Work

Select deep dives into high-impact implementations.

★ **Processed 1L+ records/hour with 0% timeout rate.**

### PROBLEM & SOLUTION

**Situation:** Client struggled with 50k+ daily records hitting Salesforce limits.

**Action:** Built a Node.js middleware on Heroku with stream processing and offloaded storage to AWS S3.

SYSTEM ARCHITECTURE

LWC

NODE.JS

 **Enterprise Real Estate File System**

PROBLEM & SOLUTION

Situation: Data inconsistency between booking site and CRM caused \$10k/month losses.

Action: Implemented a self-healing Apex batch framework with custom retry logic and error logging.

API INTEGRATION   APEX   BATCH PROCESSING

📅 Booking Platform Sync Engine

★ Onboarded 500+ partners with zero security incidents in 2 years.

PROBLEM & SOLUTION

Situation: External partners needed secure access to sensitive legal docs.

Action: Developed a custom LWC portal using JWT auth for stateless secure access.

SECURITY   JWT   SALESFORCE COMMUNITIES

📁 Secure Document Portal
